Life Anew

Things you use every day.
Created for a new way of living.

For over 100 years,
TOTO has pursued the path
of science and advanced technology
to design a world of comfort
in the most important spaces in your dreams.

Beyond more aesthetics.
Beyond simple creative comforts.
Our enduring mission - pursued with zeal
and not beholden to quaint tradition - is to turn
daily rituals into richly satisfying experiences
and to make this new way of living available to all.

Based on wellness science and maximizing
the effectiveness of materials and water,
TOTO technologies are designed to rejuvenate and replenish.
To liberate from stress and unburden the environment.
To support good health for people at every stage of life.

For body and mind in ways that awaken the imagination.
To bring to your life every day the promise of tomorrow's better living.

HISTORY

100th
ANNIVERSARY

“INNOVATIVE”
DNA
throughout the Next Century

In May 2017, TOTO ushered in the 100th anniversary of the establishment.
We look forward to tomorrow and the future, to provide people beyond expectations “every day”.

1917

1917

The company is established by Kazuchika Okura under the name, TOYO TOKI CO. LTD. which is later renamed TOTO.

1923

1946

After World War II, TOTO begins manufacturing metal fittings and faucets in addition to ceramics.

1980

TOTO launches WASHLET, providing consumers with a whole new level of cleanliness and comfort.

1980

HISTORY

1993

1993

NEOREST toilet is launched incorporating WASHLET with a comprehensive range of TOTO's innovations. It brings with it the fullest realization yet of the principle of Clean Technology.

2008

TOTO Asia Oceania Pte. Ltd. is established as the regional headquarters of the Middle East, South Asia, South East Asia, and Oceania.

The TOTO logo, which consists of the word "TOTO" in a blue, stylized font inside a yellow circle.

2008

2013

TOTO Asia Oceania launches its first Technical Center in Singapore. It serves to introduce TOTO's latest products and technologies to customers.

2013

2013

For the past 37 over years, TOTO has been developing every part of WASHLET to perfection. Since the very first model in 1980s, new innovation and features have been continuously added culminating the latest model that is the epitome of comfort and hygiene.

2015

2015

2015

The Toto Museum in Kitakyushu was opened on the occasion of the company's 100th anniversary and showcases the evolution of the business and its products. The museum highlights the historical landmarks that changed Japanese bathroom culture, including the move from rural to city living. Old toilet seats are on display, as well as exquisite porcelain tableware that the company used to produce as a side business in the past. TOTO aims to promote the appeal of this complex as a point of contact with visiting customers and clients. It positions as a landmark that disseminates information about the TOTO brand from Kokura, the birthplace of the company, to people all around the world.

Life Anew

2017

2017

TOTO exhibited at the ISH2017 - the world's large international trade fair in Frankfurt, Germany for baths, toilets, buildings, heating and cooling, air conditioning, and renewable energy from March 14th, 2017 to March 18th, 2017. TOTO began exhibiting in 2009, and this is the fifth exhibition with the new theme - "Life Anew." Not only you will be able to experience the unique technology of TOTO at the venue, you will also be able to physically touch our latest products. Through the exhibition, TOTO will share the message on its 100 years of evolution in TOTO's unique technological innovation, and for the next 100 years.

2016

40 MILLION WASHLET SOLD WORLDWIDE

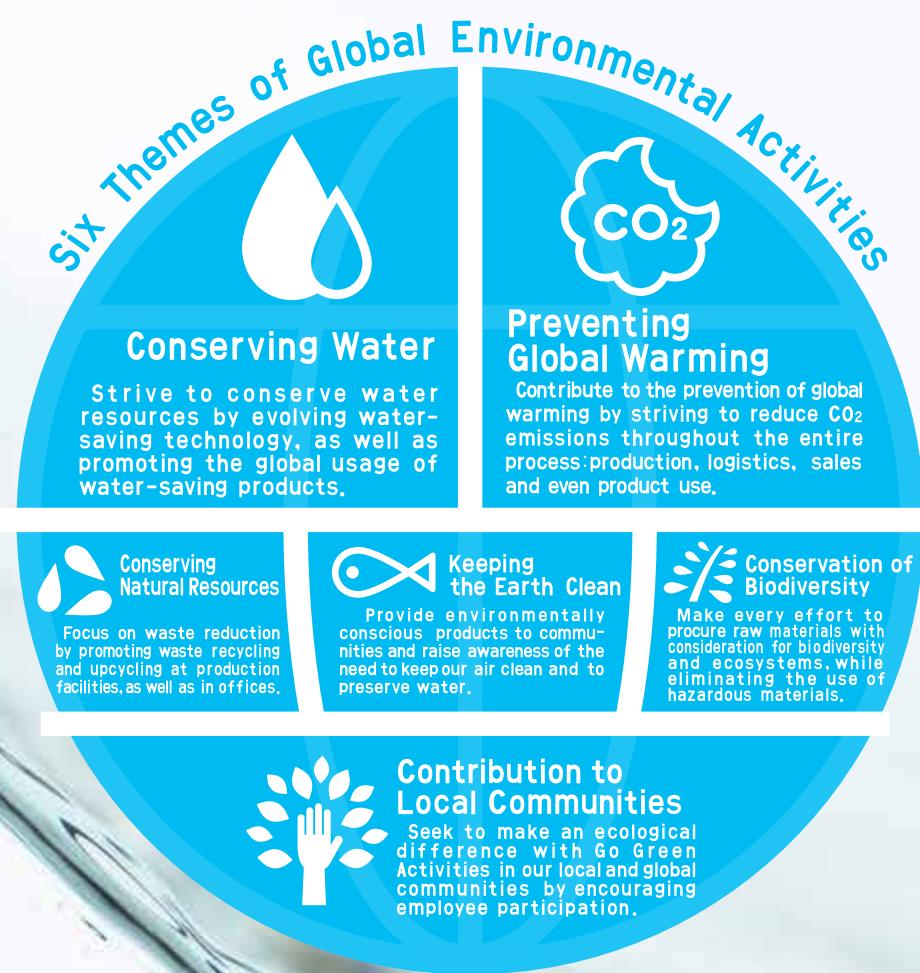

**100% TOTO
100% MADE FOR YOU**

Global Environmental Vision

Water, Earth & A Better Tomorrow

The TOTO Group has formulated the Global Environmental Vision to deepen its activities to tackle the environmental and social issues in regions around the world.

Green Initiatives

TOTO Technologies provide maximum comfort and minimum consumption

HYDROTECT-coated surfaces (facades, windows and tiles) clean themselves and the air around them. When used indoors, they are also antibacterial.

Water is aerated for a fuller, more comfortable flow of water - an enhanced shower experience that uses less water. This is why we feature the Aerial Pulse or Aerial Shower technologies in our showers and EcoCap in our wash basin faucets.

Automatic faucets save water and electricity.

Ceramics featuring the CeFiONtect glaze prevent dirt and bacteria from accumulating. They also require less water and fewer cleaning products to keep clean.

We have toilets that you can use with either a 3 or 4.8 l flush. Many of our toilets are equipped with the highly effective three-jet Tornado Flush. The rimless design and CeFiONtect glaze make it easier to clean these toilets thoroughly – no aggressive cleansers necessary. The next-generation WASHLETs, equipped with Actilight and ewater+ technologies, go one step further. They have antibacterial and self-cleaning features.

OUR DESIGN PHILOSOPHY

TOTO has a wide range of products that caters to all in terms of design and user needs. Be it the essentials or the luxury series, the designs would fit anywhere, everywhere. The principle of design lies in our philosophy of creating a Clean and Green product with Comfort.

CLEAN

TOTO embraces technology in the pursuit of cleanliness, creating high levels of hygiene and relaxation. Its Clean Technology is not only about hygiene; it provides enjoyment and comfort for everyone of all ages. It is all about increasing the user's fulfilling moments while reducing time spent on bathroom maintenance.

GREEN

Eco-friendly effects are achieved with TOTO's sustainable features that promote saving of energy and water. Some of TOTO's technologies require almost no chemicals for cleaning, and some even break down pollutants in the air. Every time you use a TOTO bathroom, the planet benefits.

COMFORT

TOTO incorporates comfort features in its Clean Technology for its products with a sophisticated eye for design. Nonetheless, TOTO's design philosophy goes beyond providing comfort to the eyes; every product facilitates easy usage and user satisfaction for everyone, dedicating the best comfort to all.

OUR AWARD WINNING PRODUCTS

reddot design award

Organized by Design Zentrum Nordrhein Westfalen from Germany since 1955, the international "red dot design award" is the largest and most renowned design competition in the world with more than 12,000 submissions from over 60 countries. The award-winning products are put before an international public in the red dot design museum.

Since their introduction in the year 1953, the iF design awards have been a reliable indicator of outstanding quality in design. The iF product design award covers all areas of product design. It serves as a platform for design-relevant innovations, thus recognizing today's globally networked world and its related dynamics.

Organized annually by The Chicago Athenaeum: Museum of Architecture and Design, together with The European Centre for Architecture Art Design and Urban Studies, Green GOOD DESIGN is the benchmark for new designs that foster a greater sense of ecological-based design, eco-innovation, conservation, green technologies, renewable energy, and sustainability to better the quality of both life and the environment.

NEOREST

with Actilight

ACTILIGHT

The NEOREST with Actilight represents the zenith of clean technology made to improve life. It is the only toilet with the technology to stay clean on its own, ridding itself of both visible and invisible waste through a photocatalytic process. Indulge in the comfort and cleanliness of NEOREST with Actilight.

MECHANISM

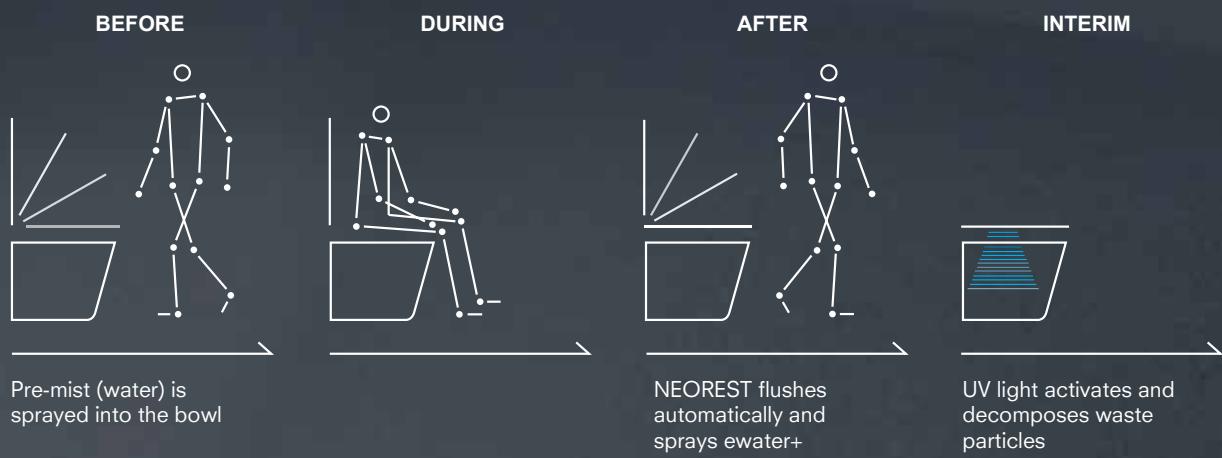

Aclilight includes two key features: an ultraviolet light inside the lid and a scientifically formulated glaze that's fired onto the bowl. These two technologies work together with oxygen and water in the air to generate the photocatalytic process that decomposes bacteria and waste.

The UV light is located inside the lid. The zirconium oxide in the glaze provides superior durability while giving the bowl a shimmering quality.

THE PURIFICATION CYCLE

When the Neorest is not in use, the ultraviolet light automatically turns on to ensure a continuously clean toilet bowl.

NEOREST represents a new style of leisure bathing. It brings you a pure enjoyment by which you can get released both physically and psychologically when having the bath. You can gain the natural implication of the combination of water and people without any hustle and bustle.

WASHLET TECHNOLOGIES

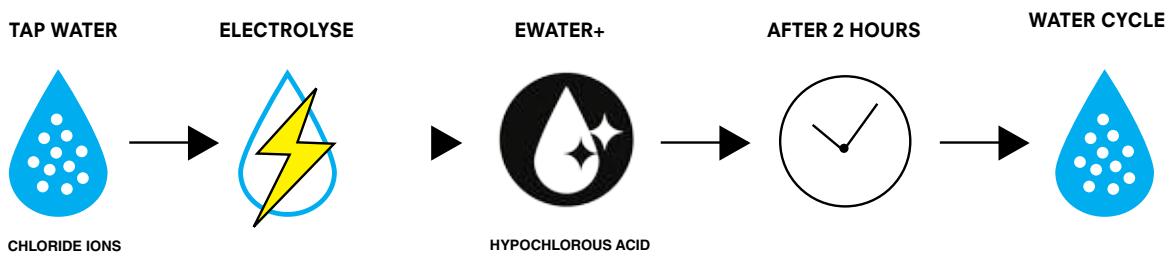

EWATER+

What is EWATER+ Technology?

EWATER+ is an antibacterial liquid that prevents waste particles from accumulating and staining the toilet bowl. It is automatically sprayed onto the toilet bowl after flushing. It eliminates 99.9% of bacteria and sterilises the bidet nozzle after every use.

ELIMINATING 99% OF BACTERIA THAT CAN BE FOUND ON THE TOILET BOWL

HOW IT WORKS

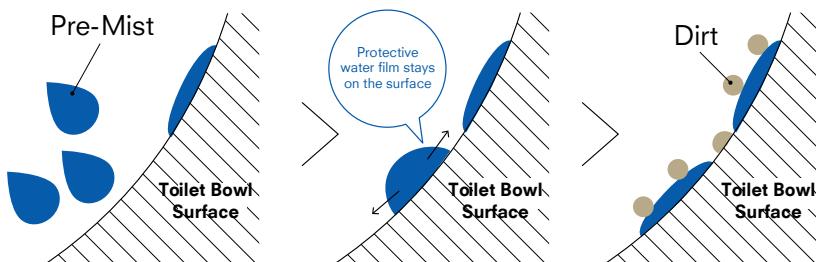

When naturally occurring chloride ions in tap water are electrolysed, they turn into hypochlorous acid, the active ingredient of ewater+. Hypochlorous acid is capable of instantly sterilising a dirty surface.

EWATER+ converts back into regular water after two hours, making it an Earth-friendly alternative to harsh household cleaning agents.

PRE MIST

The PreMist function ensures the greatest possible hygiene from the very first moment. The toilet bowl is sprayed with water prior to use. This fine film of water over the CeFi-ONtect glaze helps eliminate dirt and waste 80% better with each flush. This makes the toilet easier to clean without the need of aggressive cleaning, and improves overall hygiene.

TOTO
WASHLET

WASHLET HYGIENE BENEFITS

SELF CLEANING WAND JET

The WASHLET automatically cleans the wand jet before and after use. TOTO technology is able to clean the wand jet system using only water – without any chemical additives.

WAND JET POSITION

The jet extends at an angle, which keeps it from getting dirty. The soiled water falls directly into the toilet bowl at an angle of 43°–53°, which keeps the jet clean.

NO HIDDEN CREVICES

All areas of the WASHLET can be easily reached. There are no hidden crevices making it easy to reach and clean.

EASY CLEANING

Seat cover can be easily removed and attached back for easy and convenient manual cleaning.

EASY REMOVAL OF WASHLET

The WASHLET can be easily slot in and out from the toilet unit via the baseplate. As such it is user-friendly for the user to remove the washlet for simple cleaning.

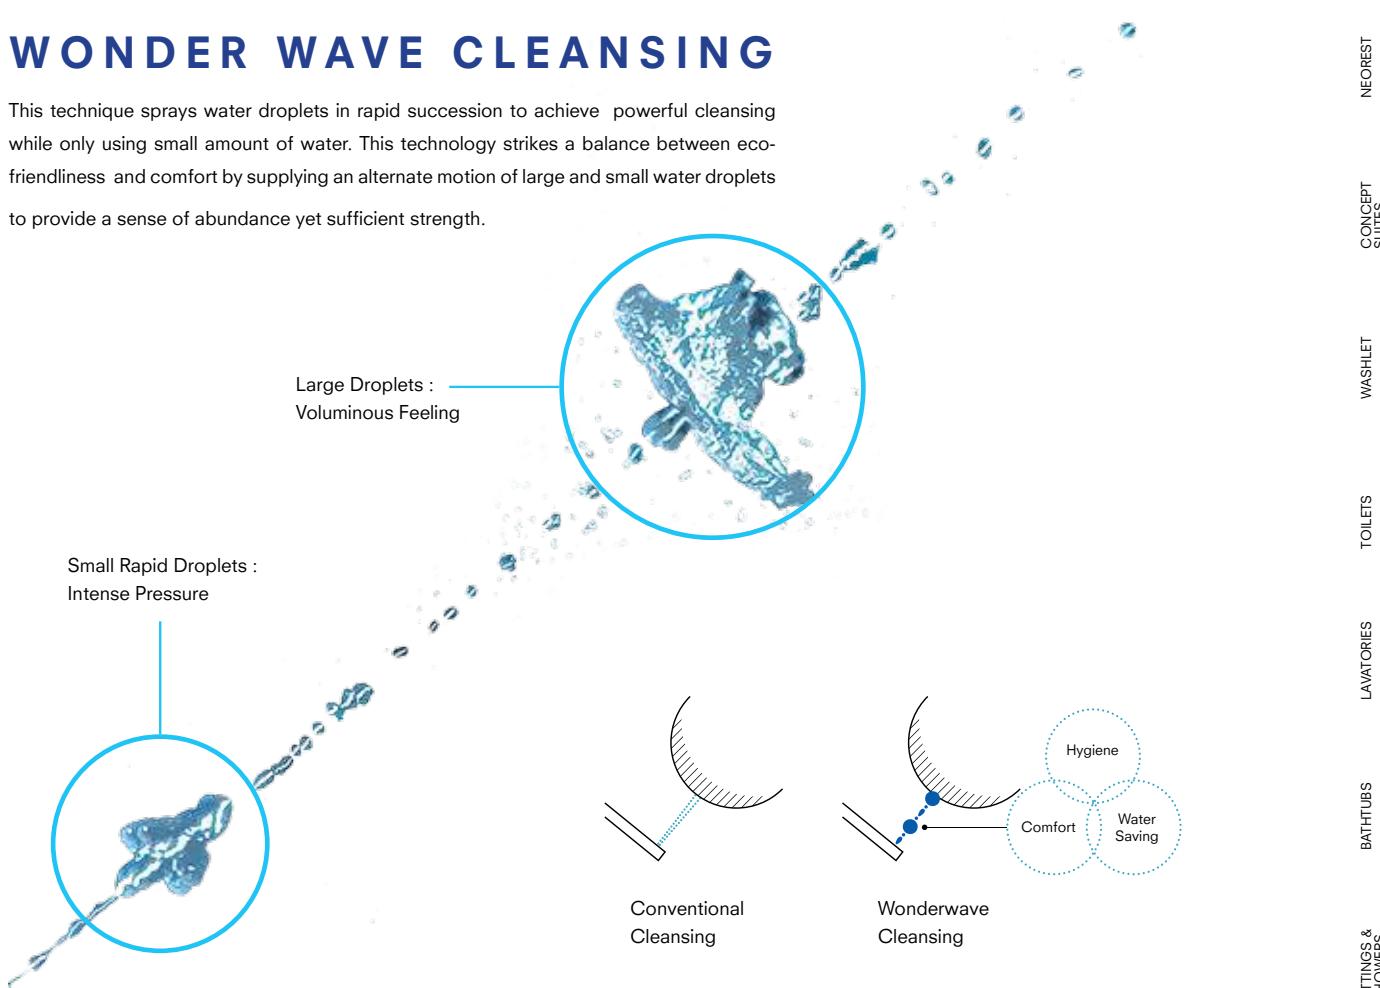

A close-up photograph of a white toilet seat. Water droplets and bubbles are scattered across its surface, particularly concentrated in the center-left area. The background is a soft, out-of-focus grey.

WASHLET CLEANSING FEATURES

WONDER WAVE CLEANSING

This technique sprays water droplets in rapid succession to achieve powerful cleansing while only using small amount of water. This technology strikes a balance between eco-friendliness and comfort by supplying an alternate motion of large and small water droplets to provide a sense of abundance yet sufficient strength.

CLEANSING SPRAY PATTERNS

Rear Spray

Clean the rear intimate area
Pleasant, yet strong water pressure to target this specific area

Rear Soft Spray

Larger radius to cover more space
Low water pressure makes for a soft, comfortable spray

Front Spray

Consists of large, soft drops for comfortable intimate cleansing
Suitable for ladies spray

Wide Front Spray

Larger radius to cover more space

TOILET TECHNOLOGIES

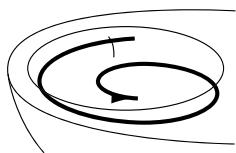

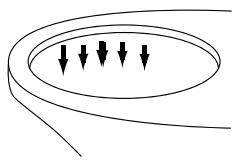

TORNADO FLUSH

360° cleaning power reaches every spot using less water

Advantages

A more quiet flush, cleans the entire bowl more thoroughly hence reducing the need for chemical cleansers

Regular Flushing

Quality you can feel with just a touch of water.

"They're always pursuing quality, so *I chose TOTO.*"

**From the past and into the future,
building each day by hand.**

However much things change, some stay the same. To TOTO this has always been the power of people, starting in 1946 with the goal of improving basin flush valves and the crafting of our first faucets. Skills and experiences have since passed between generations of artisans, in constant consideration of how to improve customers' lives and release consistently innovative products.

Strict quality control even at the prototype stage, with design and manufacture accurate to 1/100 mm detail. Machine polishing technology inherited from human ingenuity. Everyday a deeper understanding and skill in manipulating water. For TOTO, nothing is more important than pursuing a fundamental standard in safety, beauty and comfort.

Now we strive to add new value, improving on core quality while delivering increasingly functional and sophisticated designs. With people power as our driving force, we continue to release products building a "tomorrow" and "everyday" the likes of which the world has never seen.

Redefining comfort for your everyday life.

“ The technology was built with users experience in mind, so *I chose TOTO.*”

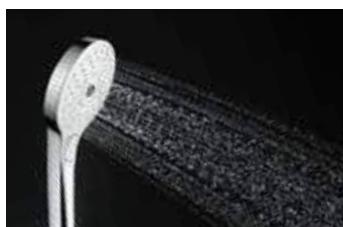

Engineering those important everyday moments.

For a beautiful, comfortable everyday life, TOTO is developing a number of revolutionary technologies.

Warm Spa

With a flow that envelops your body, this new kind of shower warms your body efficiently.

Comfort Wave

A mix of large drops and normal spray lets you enjoy a shower of moderate intensity.

Active Wave

Large drops means a more invigorating shower.

Heat Protect

Technology that keeps the faucet surface cool. Safe and compact.

Safety Thermo

Reacts quickly to prevent sudden temperature shifts. 6 times faster than conventional systems.

Mini Unit

Unified exterior sizes for embedded faucets. Create a balanced, beautiful bathroom space.

Comfort Glide

Control water flow in comfort. Love its long-lasting ease of use.

The soothing sensation continues even after your shower ends.

"The technology makes a more enjoyable shower, so ***I chose TOTO.***"

Making bath time more stimulating.

Wash off the day's weariness. Welcome a new morning refreshed. Make this essential everyday experience not just a boring bathe, but a time of joy. TOTO's new shower series has elevated design and functionality. Enjoy a truly enriching experience with complete relaxation of body and soul.

WARM SPA

WARM SPA

**Embraced in warmth,
relaxed and ready for rest.**

A brand new shower system. Water like a warm cloak.

The feeling of a warm bath, in a shower. This is the power of the WARM SPA. A single pillar of warm water running quietly from the showerhead. When water hits the body, it follows the curves and envelops it without a splash. A completely new shower experience, warming your body efficiently.

WARM SPA

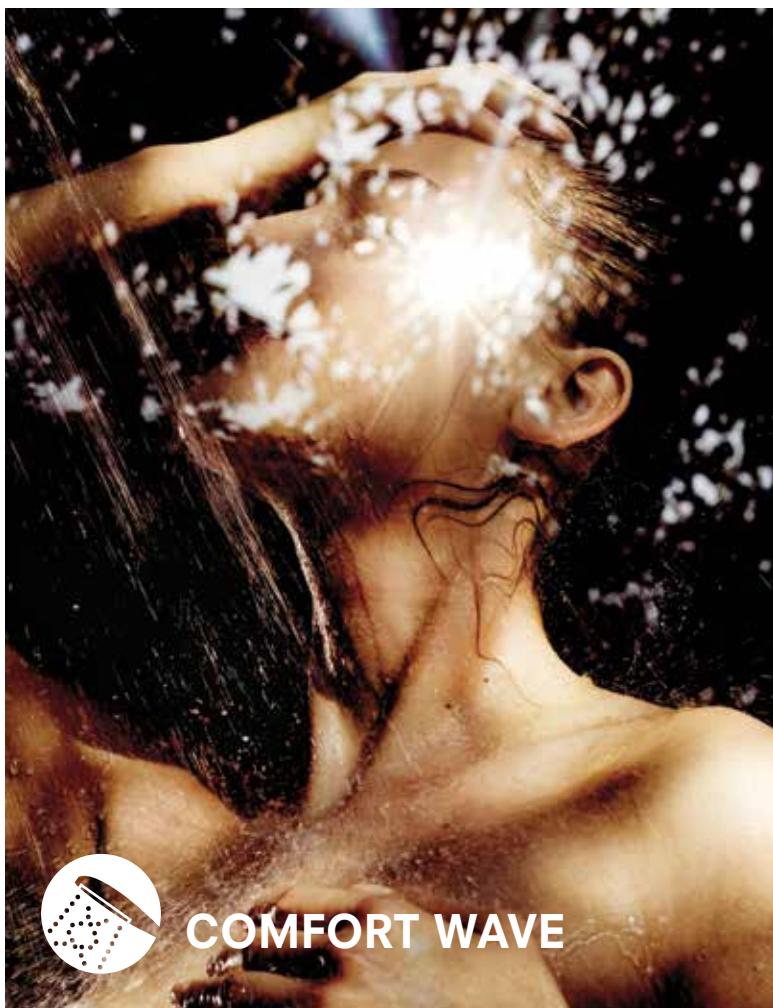

Let no heat escape. Be warmer.

Smooth water release means less heat loss. The water cloaks your body, quickly warming it. This feature is now available not only in conventional over head showers, but hand showers too.

That Quality : Only TOTO

The image depicts how the body warms up. The red area shows the warm parts of the body. Compared to conventional showers, it is evident that the WARM SPA warms the body more efficiently.

COMFORT WAVE

**Large droplets of water,
rich and dense, giving a
luxurious sense of comfort.**

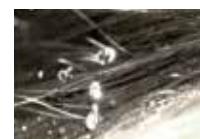

COMFORT WAVE

COMFORT WAVE uses a new nozzle to add larger drops of water to the shower, for a comfortable experience with a right amount of stimulation.

That Quality : Only TOTO

The image illustrates water penetration. While using a conventional shower, fine drops of water will bounce off the hair. Whereas, for COMFORT WAVE it will reach all the way to the scalp.

COMFORT WAVE

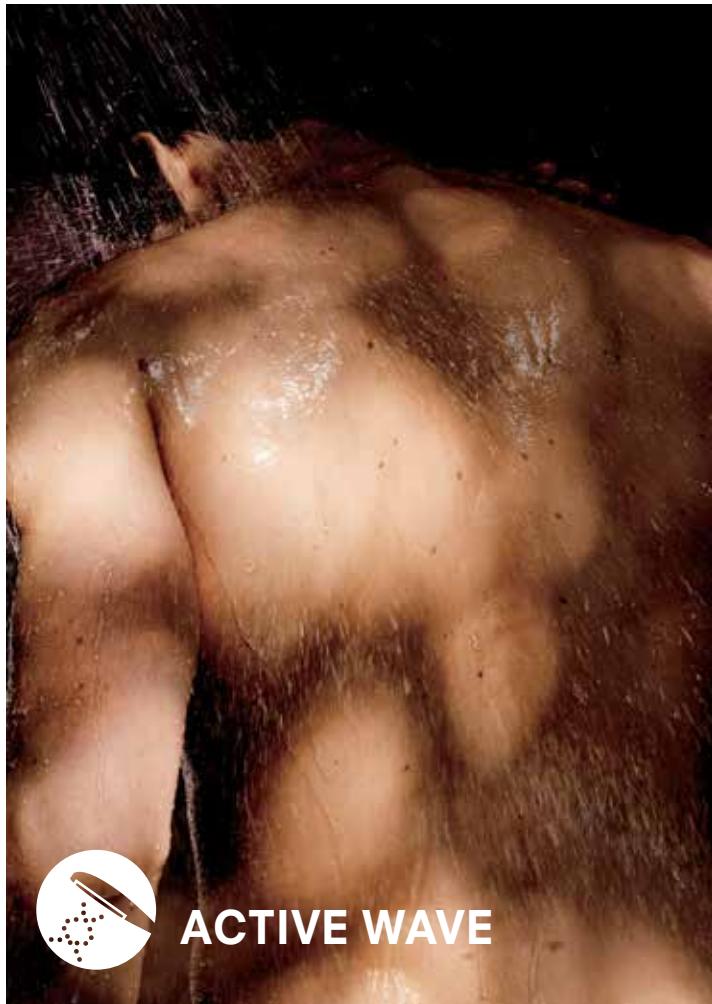

Conventional Shower

A newly developed nozzle for greater comfort.

We developed our original shower nozzles with bigger droplets than conventional showers. Large drops of water swing and flow with power, delivering a comfortable stimulating bath while saving water. Feel refreshed with the moderate-intensity COMFORT WAVE, and invigorated with the high intensity flow of ACTIVE WAVE.

ACTIVE WAVE

Stimulating to body and mind. Awakening to the senses.

ACTIVE WAVE

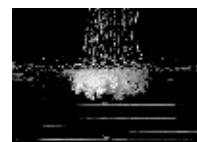

ACTIVE WAVE uses the newly developed shower nozzle which is capable of producing larger water droplets. It provides a more vigorous, uplifting shower comfort than the COMFORT WAVE.

That Quality : Only TOTO

The image illustrates the comparison of the force of water. We examined the power of water flow against a pool of water. It shows that ACTIVE WAVE has a stronger flow than a regular massage shower.

ACTIVE WAVE

Conventional Shower

A perfect showering experience with just one touch.

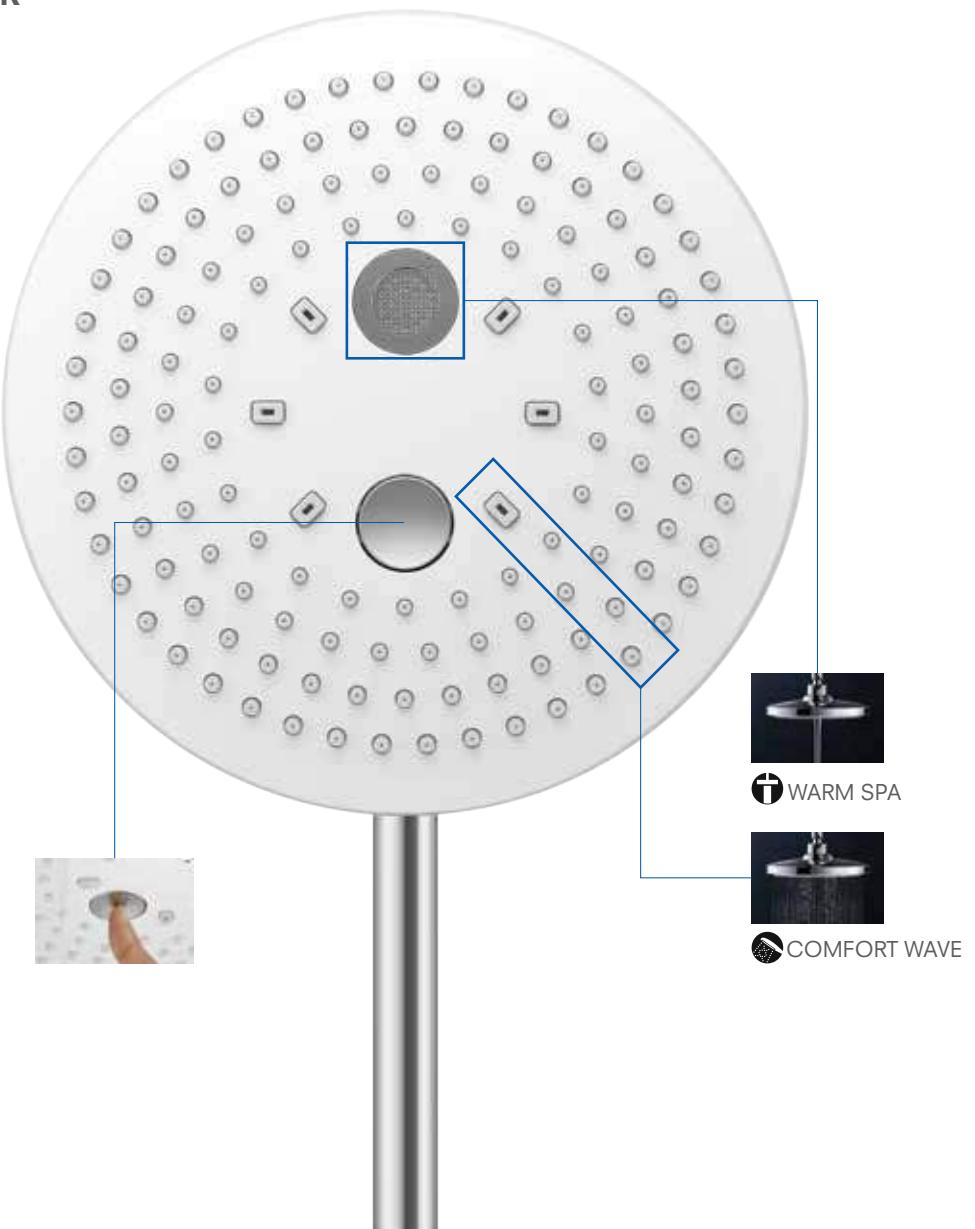

Choose your shower experience with a simple switch.

For the hand shower we installed a switch right at your fingertip, and for the over head shower the switch is located inside the showerhead. For the hand shower you can change easily between WARM SPA/ COMFORT WAVE/ ACTIVE WAVE, and for the over head shower between WARM SPA and COMFORT WAVE. Feel free to enjoy the perfect shower for your mood.

Customize your shower, for a unique sensation.

Let luxury lead you to a new state of mind.

TOTO developed its multi-function shower for a more comfortable user experience. By quantitatively analyzing human sensation, we have researched and developed a shower with the optimum level of comfort. WARM SPA/COMFORT WAVE/ACTIVE WAVE are the pinnacles of this research. They will wash off negative feelings and guide you to a whole new state of mind. Wash away the weariness of the day, or wake up to a new morning with this shower. Let this time of luxury cleanse your soul.

Create a pleasant shower experience that is safe for everyone.

An unique approach to every risk

For a pleasant shower, comfort is important but safety is essential. TOTO uses a unique structure developed through continuous research to prevent the various risks associated with taking a shower.

[Over head shower fall-prevention device]

Multiple structures for fall prevention.

When used over many years, the hardware showerhead mount can loosen or break, meaning the showerhead could potentially fall. By incorporating a unique safety feature, we can prevent this from happening.

[Shower Holder]

Stopping plate peeling and rotation before they start.

Holder (Additional Resin Layer)

With our original safety design, we adopted a shower holder system from which the metal plating does not easily come off. Thus we can prevent injury caused by touching the area that would normally be exposed.

Rubber Cap (with protrusion)

The showerhead is prevented from unintentionally spinning or coming off of the holder because of the power of the water.

Anti Spin

Anti-Fly Out

HEAT PROTECT

Experience a bathroom where safety and beauty become one.

Unique technology keeps the surface cooler.

When you use hot water, the surface of the faucet also gets hot. TOTO's solution is a unique innovation in design. By covering the path of the hot water with a layer of cold, HEAT PROTECT is able to prevent burns when accidentally touching the fixtures.

Industry-leading compactness brings sophisticated style.

We created the industry's smallest diameter of Ø45mm while providing superior insulation performance.

That Quality : Only TOTO

The diagram shows the temperature of the fixture after letting water run for 30 minutes, the hot water temperature set to 60° and cold set to 15°. This demonstrates how the temperatures of the main parts of the faucet – those that make most contact with the human body – are prevented from rising.

■ ~20°C ■ 20°C~45°C ■ 45°C~60°C

SAFETY THERMO

Safe, reliable water temperature means a more relaxing bathtime.

Temperature swings, solved in an instant.

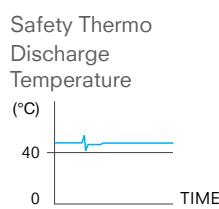

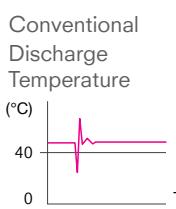

Let's say a family member uses water while you are in the shower. This can often create a sudden, unwanted increase in the shower water temperature. SAFETY THERMO prevents this from happening. A coil made of Shape-Memory Alloy (SMA Coil) reacts instantly to water temperature change, keeping the temperature from rising.

Temperature control, 6 times stronger.

Our SMA coil detects water temperature instantly. Compared to a traditional wax type, it reacts to hot water 6 times faster (in-house comparison).

That Quality : Only TOTO

The graph shows water temperature and time. It is apparent that a conventional faucet experiences large temperature fluctuations. In contrast, the graph for SAFETY THERMO shows very little change, as temperatures are kept very steady.

MINI UNIT

Small and Flexible.

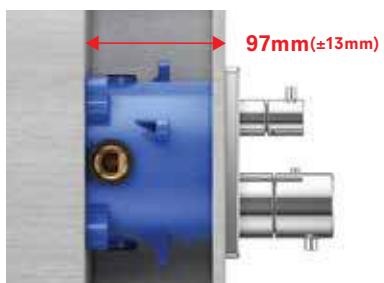

The exact exterior you want.

Concealed faucets help to live up the bathroom. TOTO's MINI UNIT is a technology that gives you more space and freedom. We don't match the concealed system to each trim, instead we use a shared module. You can choose the functionality you need such as a single lever type, thermostat type, or touch button type, and also make choices based on design features such as circle or square fixtures.

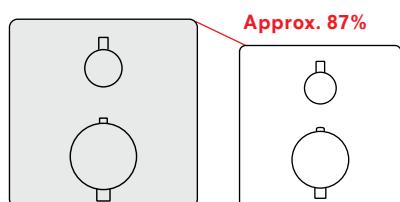

Easier to install. Less load on the frame.

A high degree of flexibility when installing the MINI UNIT is one of its most attractive features. We were able to achieve one of the industry's smallest and lightest bodies for the concealed system. It puts only a minimal load on the architectural frames and has improved manageability during installation. In order to conceal the unit, the wall only needs to be 97mm, and the system is able to absorb installation errors of $\pm 13\text{mm}$.

Industry-leading miniaturization. Beauty in balance.

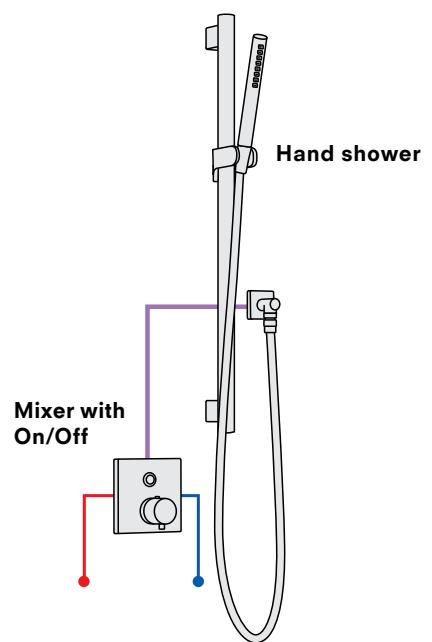

We shrunk the unit to one of the industry's smallest. The trims are also some of the most compact. In addition, our progress towards uniform sizes mean units can be used simultaneously to create a beautiful space. We also strived to make the trim as thin as possible. A bathroom of unity and style can be yours.

Personalize a space to match your lifestyle.

1 OUTLET

The most simple.

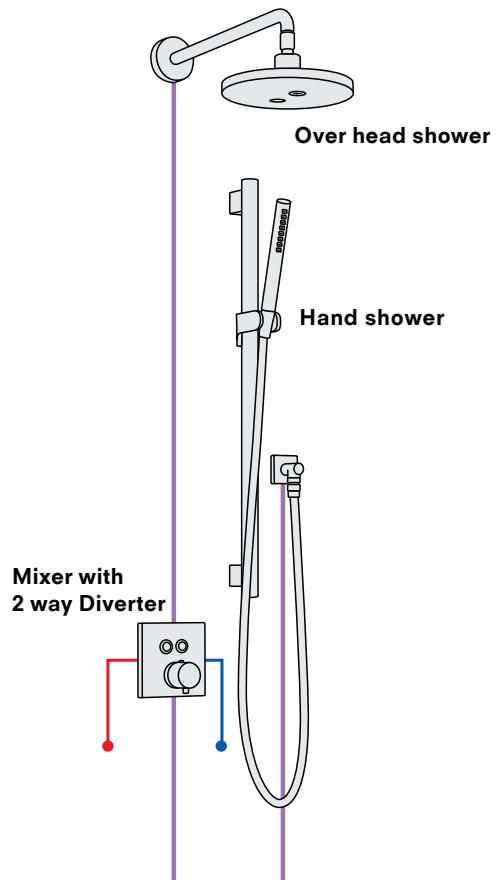

A shower space designed with 1 shower outlet (choose between a hand shower, an overhead shower or a bath spout). It's the simplest way to enjoy a comfortable bath experience.

Match your lifestyle to one of three shower systems.

Besides water flow and design, you can choose the number of outlets from TOTO showers as well. From something simple to highly decorated, options are available based on your lifestyle and design preference.

2 OUTLET

Enjoy a different kind of bath.

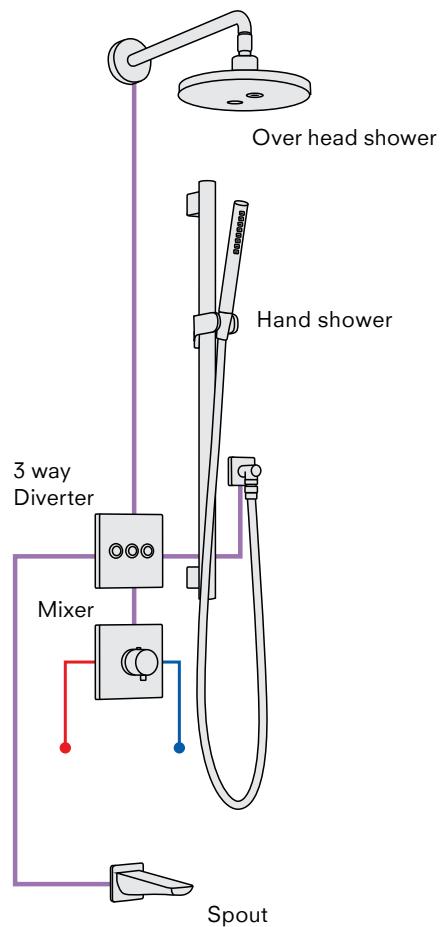

A shower space designed with 2 shower outlets (for e.g, a hand shower + a overhead shower). It depends on how your personal preference on how you wish to combine your showers for the best shower experience.

— Hot water — Cold water — Mixing water

COMFORT GLIDE

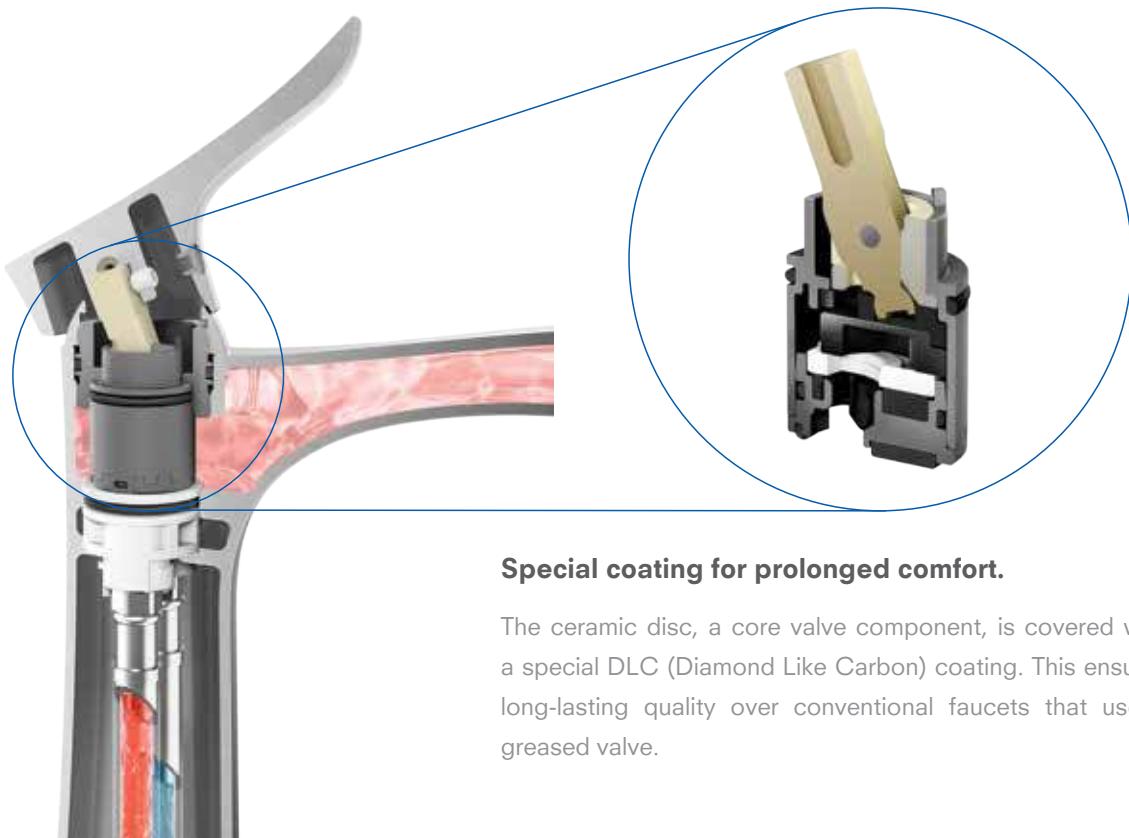

COMFORT GLIDE

**Easy to use,
for a lifetime of comfort.**

Ease of use, based in sensation.

Comfort. For TOTO, this does not simply mean comfort of movement. Ease of use, when it lasts a long time, becomes comfort in itself. For this purpose, TOTO has developed the internal valve based on users' touch. Designed from the ground up to provide a fundamental comfort in operation.

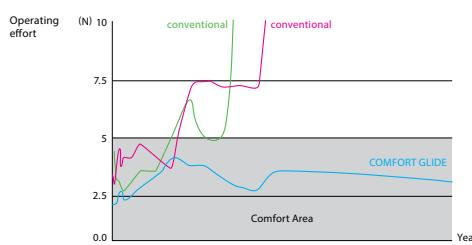

Special coating for prolonged comfort.

The ceramic disc, a core valve component, is covered with a special DLC (Diamond Like Carbon) coating. This ensures long-lasting quality over conventional faucets that use a greased valve.

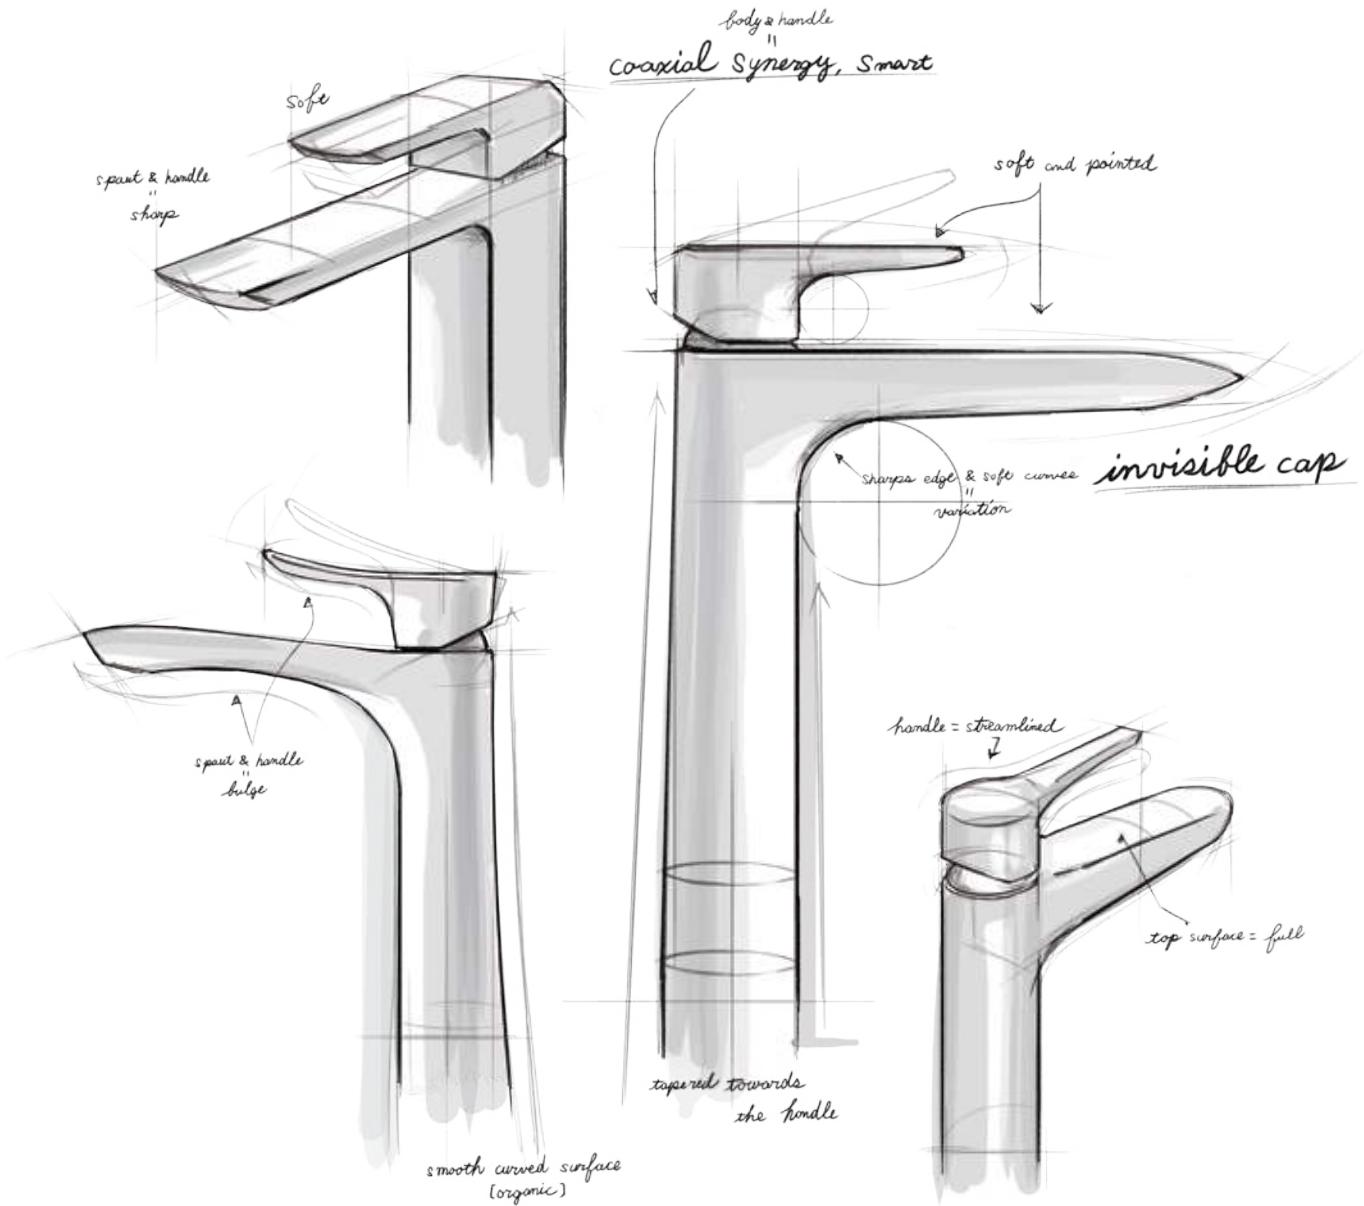

Precise flow control, exclusive to TOTO.

Our exclusive technology means new functionality. We took the core component of the valve, the ceramic disc, and customized its shape for ease of use. Compared to conventional faucets, it's easier to control water flow when just a little is required, such as when you are washing a contact lens. Because you can achieve the right amount of water flow instantly, it helps conserve water. *Adjustable flow functionality is only available for lavatory faucet for deck mounted types "

That Quality : Only TOTO

The graph shows the number of years in use, and its operating force. It is evident that comfort lasts for a long time with models featuring COMFORT GLIDE.

Smart Design, Fascinating Forms.

Refined design, down to the last detail.

The faucet handle and body share the same axis, one seamless shape for a beautiful gilt reflections. Installing the tip of the spout inside means it is easier to clean and gives a smart silhouette. With the smallest detail, TOTO have a unique line up faucet series.

Freedom to design, your unique personal space.

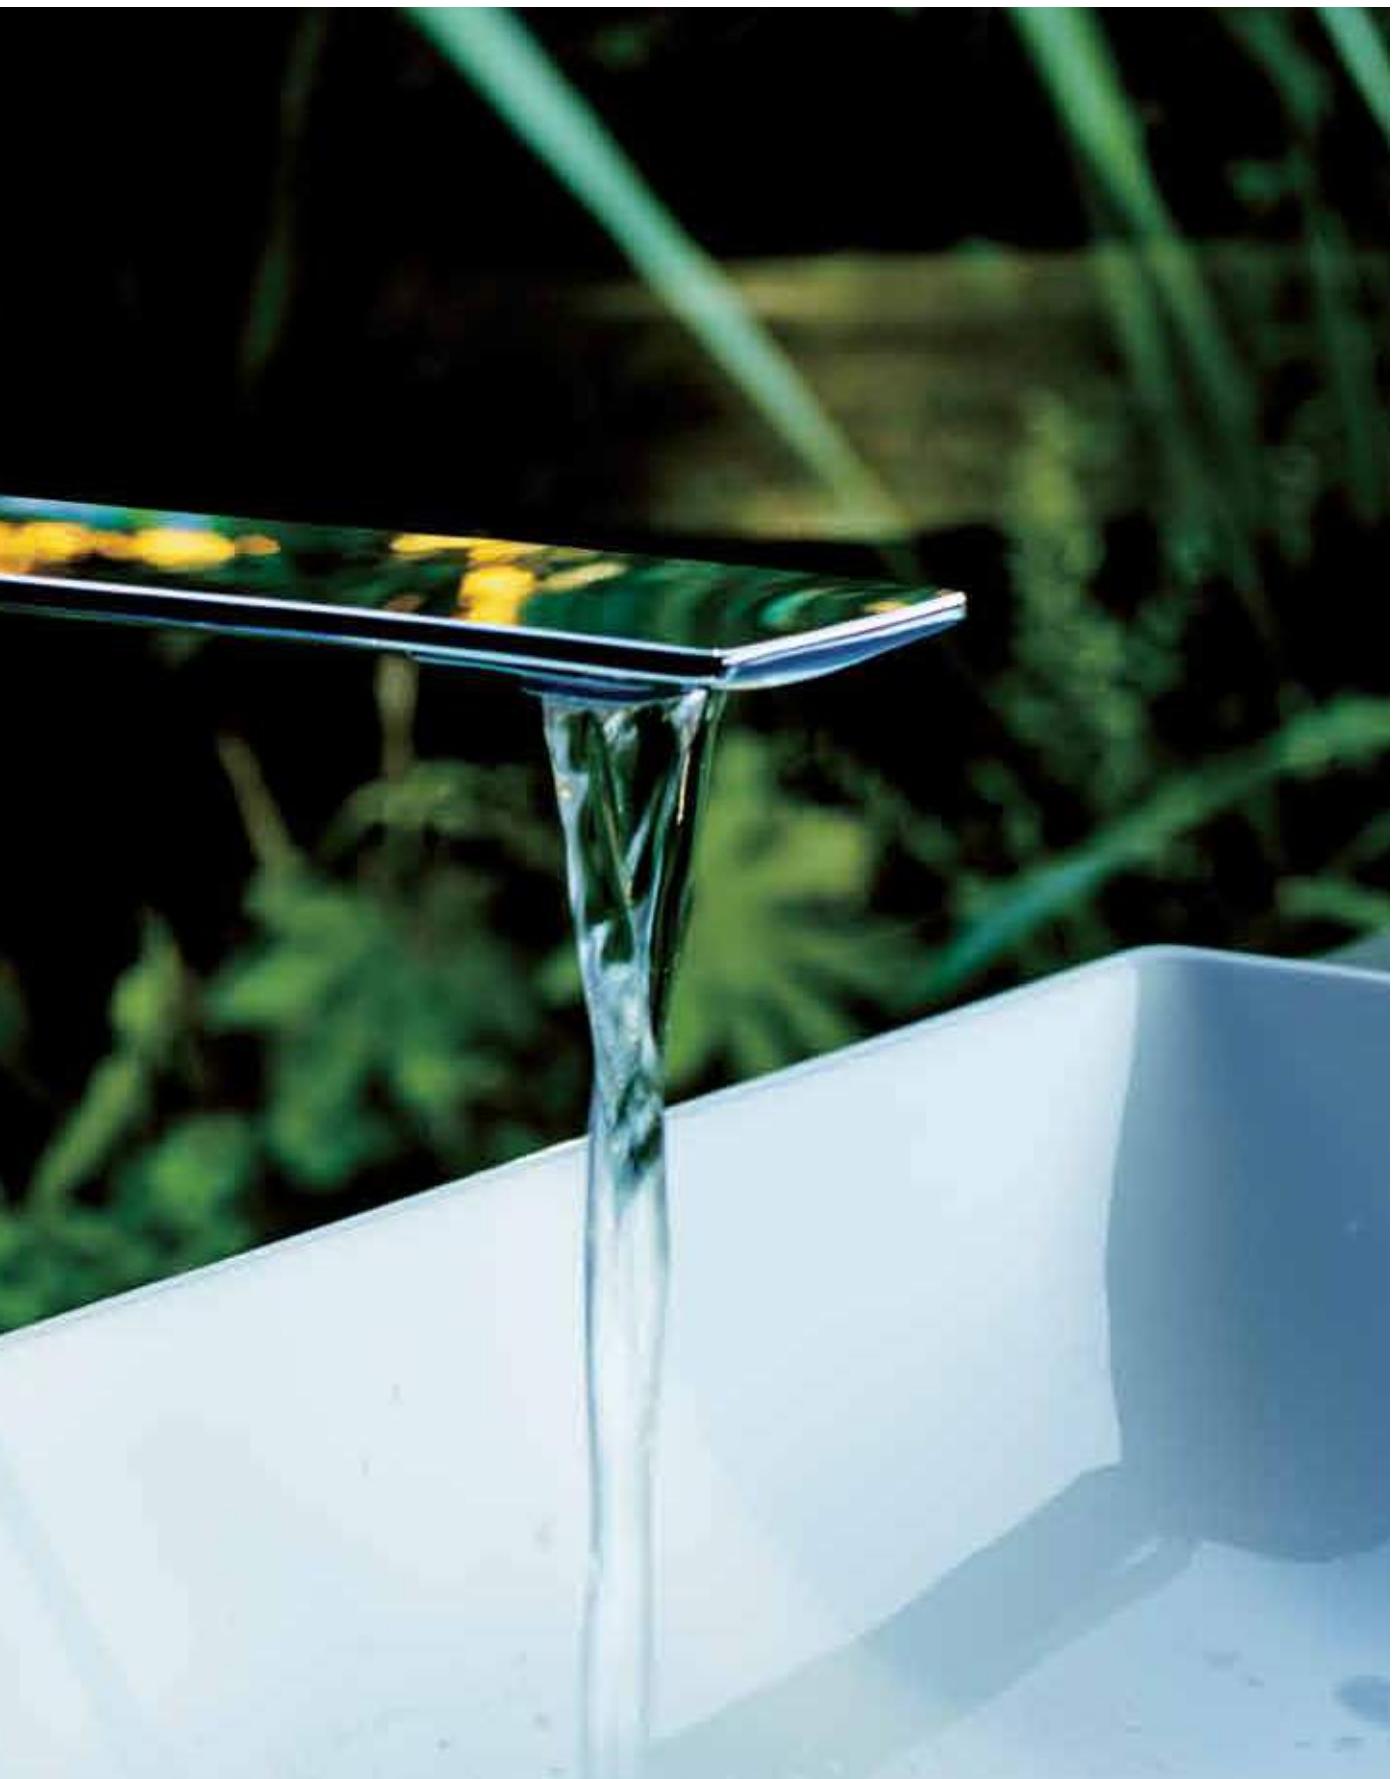

Mix & Match to your taste.

In addition to the standard Polished Chrome, we offer Brushed Nickel, Polished Nickel, Brushed French Gold and Polished French Gold with a total of 5 color choices. The color variations capture current trends and help create spaces fit for various personal preferences.

NEOREST

Conspicuous in its absence, a space of ultimate luxury.

Achieving a thin edge of just 3mm. One of the world's thinnest spouts and beautifully contoured lines brings you ultimate silence. It's as thin as a steel plate, and its sleek appearance will fit seamlessly into any space. In order to achieve this, we used stainless steel welding technology, an unusual method for faucet production. This innovative approach made it possible to achieve a thickness unattainable by ordinary methods. We put all of TOTO's knowledge and technology into creating a beautiful finish to the faucet, such as inconspicuous joints and a polished, mirror-like surface. Of course, we achieved a full, strong water flow, fitting for such a high-end faucet series. Quiet yet impactful, we bring you a new design that combines these seemingly opposing concepts.

Decorate your space with the new standard of beauty.

The union of taut curves and edges.

With the top's surface taut curves, smooth spout surface and sharp line edges : such variation in the silhouette gives the shape an unique presence. The edge and smooth flow surface represents an exquisite craftsworks that is only achievable by a master craftsman. Looking well composed and elegant, it is an advanced standard series that is suitable for the new generation.

GR SERIES

Geometric shapes that sparkle.

See elegance in reflections.

The sharp edge of the spout and handle gives a proper weight and balance to this series. In contrast, the top panel incorporates curves and a soft slope, making it look elegant. Similarly to a sparkling glass, it boasts a splendid presence and impression. Its geometric forms and the beautiful expression hidden within the sparkles.

GS SERIES

Set the standard for everyday beauty.

Smooth shapes that will become a standard.

A simple design with a modern twist. This GS series fits the modern living space. It is the transformation of geometric shape into smooth organic lines. A soft panel bulge transformed the flow of the surface water. We pursue a simple look that would be favourable for future generations.

**The simplest designs
can be the most beautiful.**

A beautiful blending of branches.

Composed of combinations of simple cylinders, pulled together by the smooth curves plane. We strive for a beauty that look like the branches of a tree. It will being an organic form in an inorganic space. Enjoy your everyday in a most sophisticated space.

Classical elegance for a new today.

Modern approach, classical touch.

A hint of nostalgia with a modern vibe. Creating a look and form where two different styles can work together. A beauty that exists only in this modern society. Simple but with a tinge of classical elegance.

Flowing curves that look better everyday.

Complimentary designs that never lose their appeal.

A rounded form compliments the ridgeline. It have a three dimensional surface that enhance its material's quality. The smooth, sea glass form will refresh your senses with an everyday touch.

Breathe new life into your bathroom.

More compact, yet more volume and flow.

A casual look designed with everyday use in mind. We achieve the dual senses of size and tension even in tight bathroom spaces. The right sense of volume and presence. This series was born of the desire to bring flexibility to the everyday lives of various people.

Safety with you in mind.

That Quality : Only TOTO

We imagined the worst case usage scenario, and worked back from there to determine the required surface temperature. For example, even when 90 °C hot water passes through, the area that comes into hand contact will remain 45°C (close to shower temperature) or less.

SHOWER TECHNOLOGIES

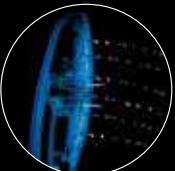

AERIAL SHOWER

Aerial Shower aerates the water to make the shower experience more enjoyable. You feel as though you're standing below a particularly full stream without any increase in the usage of water.

Advantages

Comfortable shower experience, less water consumption

MECHANISM

A secret chamber mixes the air into the water without slowing down the flow. Results in full coverage shower that uses less water.

AERIAL PULSE

TOTO fixed shower heads are equipped with Aerial Pulse technology offering a voluminous flow with little water consumption. Air is drawn in through the shower head and added to the water. The shower head pulses the enlarged water droplets as they fall to give a relaxing experience.

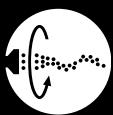

Advantages

A more enjoyable shower experience, less water consumption

MECHANISM

The pulsing effect is created by rapidly altering the concentration of air inside the water droplets.

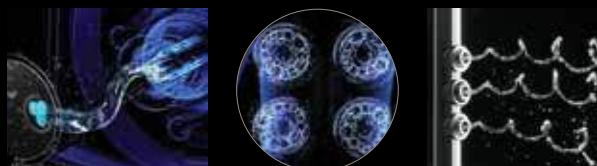

GYROSTREAM

The bathroom is a space where health and well-being take centre stage. Gyrostream offers the same relaxing effect that you'd find in a bathtub. Rotating nozzles deliver a stimulating massage that spreads its effect over a wide area of the body.

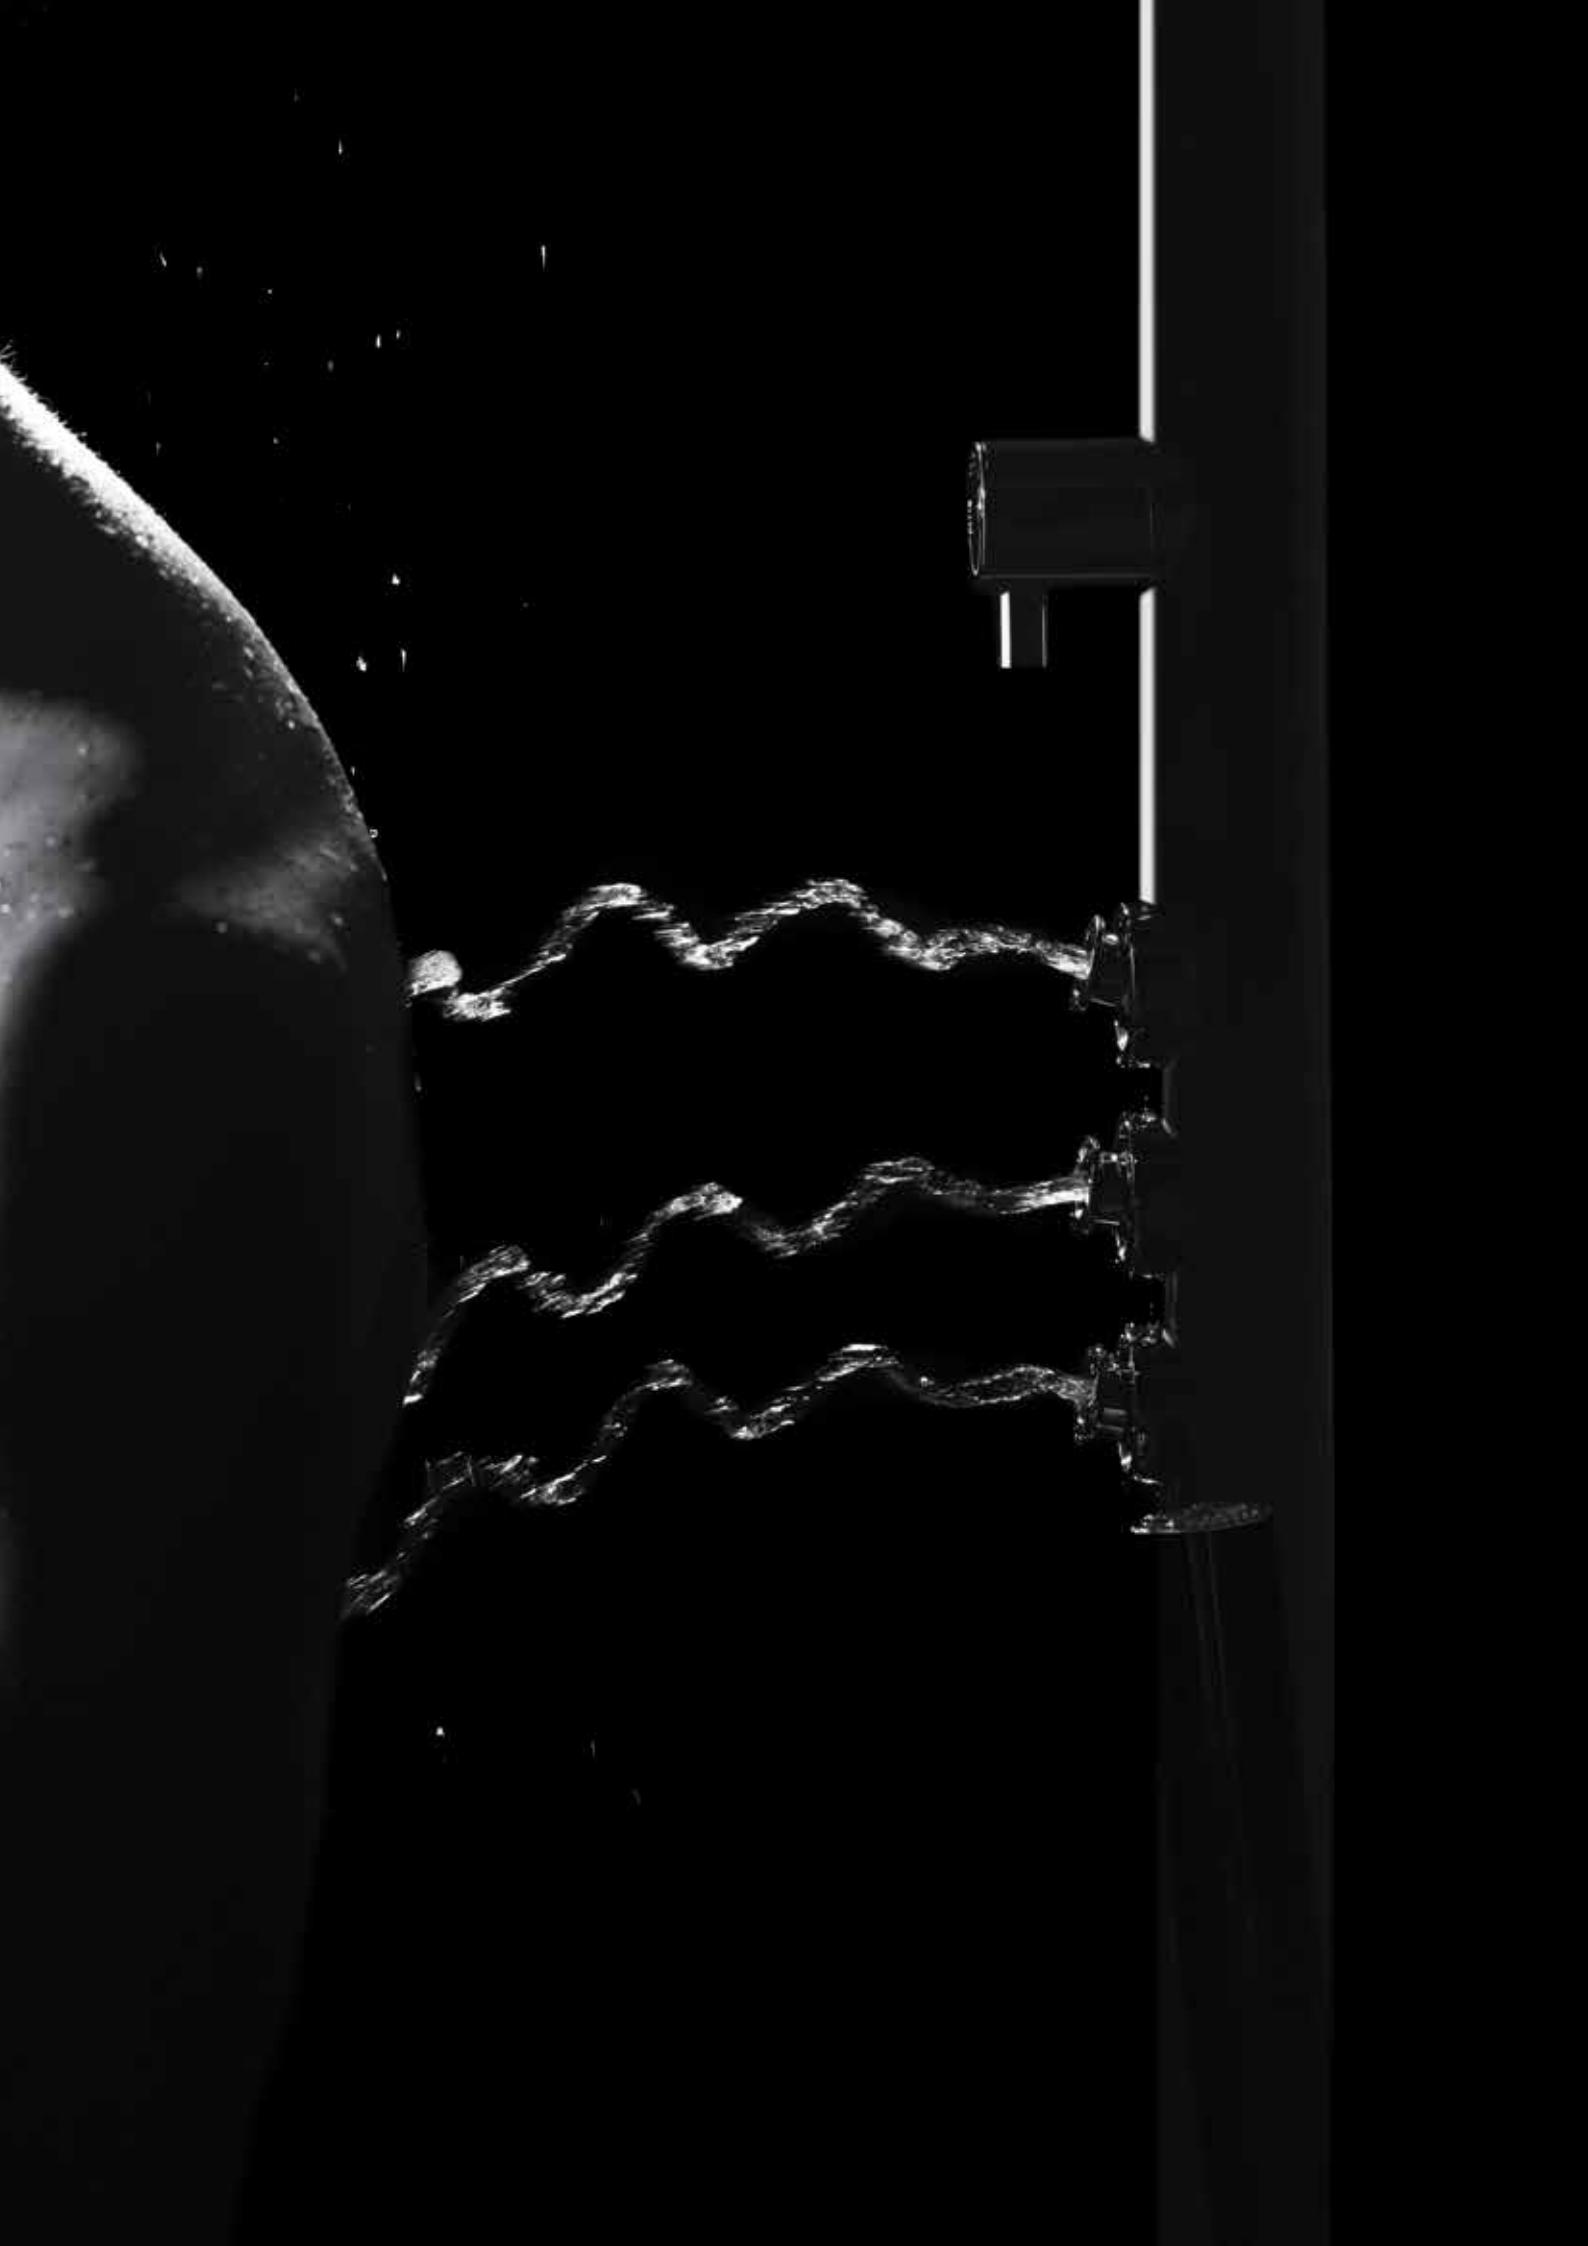

Advantages

Massage function, consistently keeps the body warm

MECHANISM

Water sprays out through nozzles that rotate in two different directions resulting in a powerful flow of water. These water vortices provide an invigorating massaging effect.

Battery Operated Controller

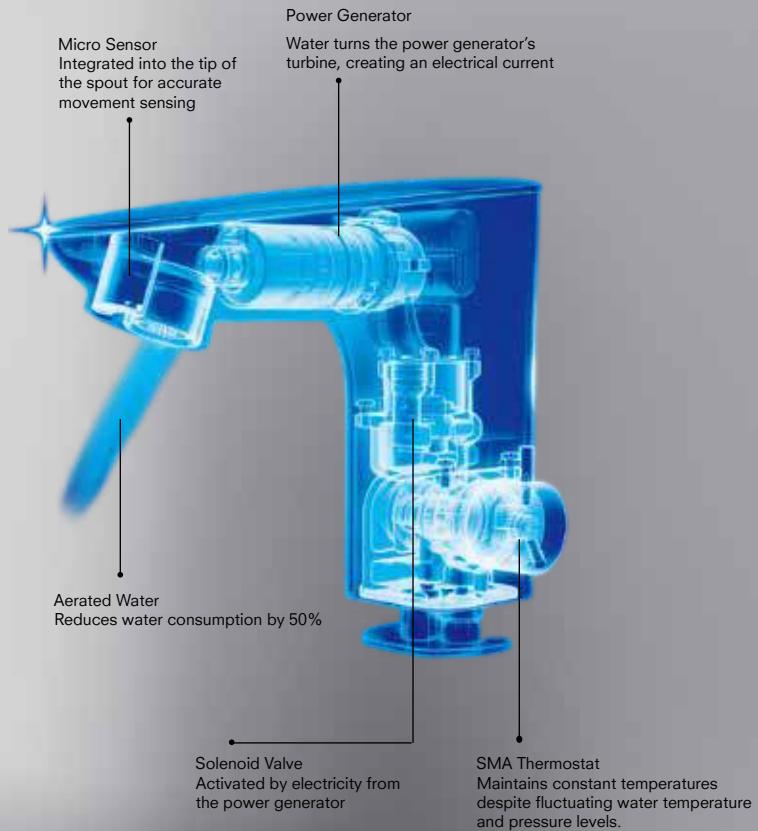

SELF POWER

TOTO automatic faucets no longer need power from an electrical outlet. The energy from the flowing water is used to charge a battery that powers the faucet. The faucets require practically no maintenance.

Advantages

Easy to use, reduces physical contact, requires no external power supply, uses little energy

AUTO FUNCTIONS

The automatic faucets feature an almost invisible sensor in the spout. It registers every hand movement precisely and is tamper-proof.

Advantages

Ease of use, no need for direct contact with the toilet, regulates energy consumption

POWERED ELEVATING TOILET SEAT LIFT

Instructions

Recommended Procedures

Slant Incline

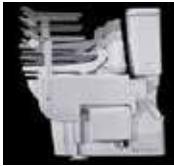

Assist users to bend their legs slightly and able to stand up with slight push forward

- Able to incline with the correct speed and direction for the user while standing or sitting
- The operation angle of the toilet lift is 0° - 15°, able to stop within the range

Vertical Incline

Suitable for users who feel that the height is insufficient and have not enough strength to push forward and unable to bend their legs and want to stand up with a stable movement

- Able to incline vertically and stop within the range of 117mm.

HYDROCERA

PROPERTIES OF HYDROTECT

Hydrotect is an environmental purification technology that cleanses our living environment by a photocatalytic reaction that harnesses the power of light and water.

Photocatalytic

Hydrotect produces a number of environmentally-beneficial effects through a process similar to photosynthesis in plants.

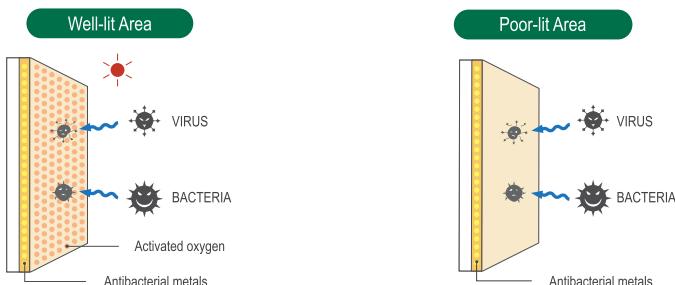

When exposed to light, titanium dioxide produces electrons (e^-) and holes (h^+). These react with oxygen and water (O_2 , H_2O) in the air to produce activated oxygen (O_2^- , OH). This oxygen decomposes organic substances on the surface of products.

When titanium dioxide (TiO_2) is exposed to light, the titanium (Ti) reacts with water (H_2O) in the air, producing a hydrophilic layer that easily washes away any dirt or grime.

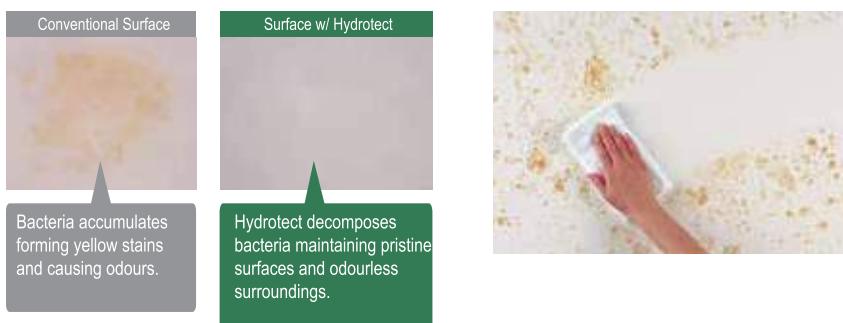

Antibacterial

Antibacterial metals make it possible for surfaces with Hydrotect to decompose bacteria in poor-lit areas as well as under the sun. This improves hygiene on walls and floors in indoor areas such as toilets, bathrooms and kitchens.

Anti-Odour

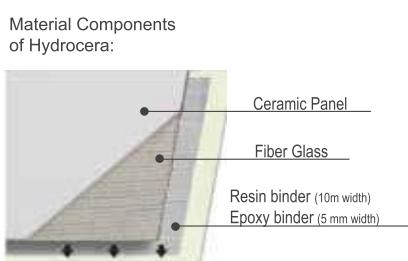

Through the decomposition of organic substances, surfaces remain free of stains that often emit foul odours.

Highly Durable

HYDROCERA is fired under extremely high temperatures of $1200^\circ C$ making it exceptionally durable and long-lasting.

PROPERTIES OF HYDROCERA PU**STAIN RESISTANT**

Stains penetrate into the surface

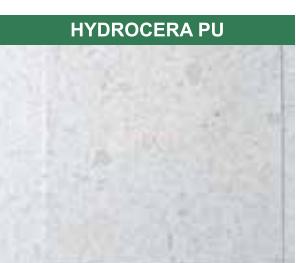

Surface is clean after a simple wipe

- Testing Method**
- ① Coloured drops are applied onto the surface and left for one hour.
 - ② The surface is wiped with a damp cloth.

ANTIBACTERIAL

Pink slime appears

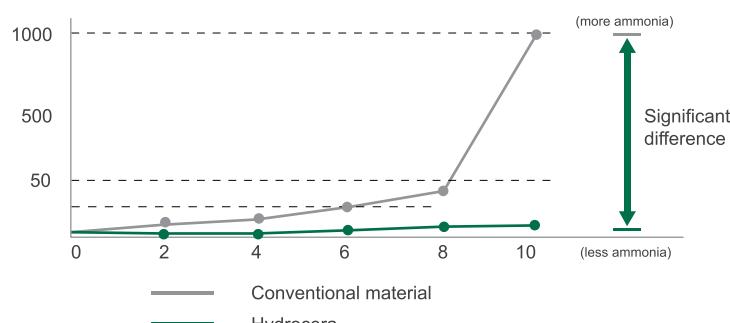

Remains clean

- Testing Method**
- ① Liquid droplets containing bacteria are applied onto the surface.
 - ② The surface is placed in a humid bathroom for a two-week duration.

ANTI-ODOUR

Anti-odour Test by Ammonia Level (ppm)

**Testing Method**

- ① Urine is applied on the surfaces.
- ② The ammonia level is measured after two days.
